BRILLIANT NIGHT SCENE. INCIDENTS OF THE DAY.

[BY THE ASSOCIATED PRESS-P.M.]

SAN FRANCISCO, Aug. 15.—San Francisco tonight, in the downtown portions, presents a holiday appearance. With flags flying from hundreds of street masts, with innumerable electric lights converting the city's main artery into a fairy spectacle, and with thousands of strangers good-naturedly jostling their way through the crowded sidewalks, the metropolis tells of the advent of the men who wore the blue in the stirring times of the sixties.

Today has been the busiest of all at the Grand Army headquarters. From every section of the United States special trains have been arriving bearing State delegations and special parties. It is estimated that 5000 visitors arrived, and among them were posts from Connecticut, Maine, New York, Massachusetts, Ohio, Minnesota, Kansas, Arkansas, Iowa and Chicago. In one special came Colorado and Wyoming posts, including Denver. Reports indicate that there are about five thousand more on the way who should be in tomorrow.

Much interest centered around Gen. Nelson Miles, who arrived very early today, and his rooms have been thronged with visitors, day and eventing. In his party are four men who were on his staff when he commanded two divisions of the army corps is 1864-65. They are Col. Nathan Church of Ithaca. Mich.; Gen. John S. Mc-Ewen of Albany, N. Y.; Maj. Black of Valley Falls, N. D., and Maj. Alex Sweeney of Steubenville, O.

Gen. Miles said: Th will be a very interesting and important reunion, and probably the last that will be held in san Francisco. In point of numbers it will be about the same as other encampments. I cannot remain here longer than Thursday, as I have a very important engagement in New Hampshire that I must keep."

Gen. Miles declined to discuss his recent retirement, or to say anything having relation to politics.

Commander-in-Chief Stewart's train came in tonight, and he was given a very enthusiastic greeting.

At the Falace Hotel today there was an interesting incident. As a veteran was registering BRILLIANT NIGHT SCENE. INCIDENTS OF THE DAY.

one of the best held in years, despite the distance tha tmost of the veterans have had to travel. There are now nearly 20,000 members of the G.A.R. in this city, and it is expected that several thousand will reach here tomorrow on delayed trains. Today nineteen special trains arrived, bringing in 6000 persons.

The city is beautifully decorated for the occasion, the feature of Marketstreet decorations being the tall poles on each side of the street for many blocks, each surmounted by an American flag and with a cluster of smaller flags below. From each pole are strung lines of electric lights across the street, and at "newspaper corner," the junction of Market, Third and Kearney streets, a big arch, resplendent with lights and rich in bas-relief pictures of scenes in the Civil War.

audence tell the story or ner wrongs, especially when she may be subjected to cross-examination by oversealous counsel. I do not believe this latter, but it must be remembered that often the unfortunate victim never lives to tell the story of her wrongs, and if she does survive she must tell it to some, and the whole community knows the fact. Even in the courtroom any highminded judge will stay counsel from unnecessary cross-examination, and, finally, if any lawyer should attempt it, the community may treat him as an outcast. I can but think that if the community felt that the criminal would certainly receive the punishment he deserved, and receive it soon, the eagerness for lynching would disappear, and mobs, whose gatherings too often mean not merely the destruction of jails and other property, but also the loss of innocent lives, would greatly diminish in number.

"One thing is certain, the tendency of lynching is to undermine respect for the law, and unless it be checked, we need not be astonished if it be resorted to for all kinds of offenses, and oftentimes innocent men suffer for wrongs

(BY THE ASSOCIATED PRESS—P.M.)

BUTTE (Mont.) Aug. 16.—A special to the Miner from Stevensville, Mont., says the body of the six-year-old boy named Buck, who, it was believed, had been aducted by a stranger two days ago, was discovered near here today by a searching party. The lad had been made the victim of the most heinous crime ever committed in the intermountain country. The child's body had been shockingly disfigured with a knife by the man who committed the outrage. This afternoon, the Coroner's jury returned a verdict that the boy had been murdered charging Walter Anderson of Missouls with being responsible for the boy's death. Anderson is now in jall at Hamilton. Cltizens of Stevensville are highly wrought up over the affair, and it is said they were preparing to bynch Anderson tonight.

Later—An angry crowd has congregated on the streets of Stevensville, and apparently the only thing lacking to complete a lynching party is aleader. The parents of the murdered boy are doing their utmost to prevent into violence, and thus far the mob appears to be respecting their wishes.

toman administration of Monastir, Uskub and Adrianople.

The memorandum next relates in detail a number of such cases in each villayet. Beginning with the villayet of Salonica, it states that in the town of Salonica, it states that in the town of Salonica itself the Bulgarian professors of the university, the students and shopkeepers, in fact, all the intelligent Bulgarians in the city, have been cast into prison. One hundred and twenty soldiers entered the village of Gorna-Ribnitea, May 18, and tortured to death five men and two women. During the first three weeks of July twenty-five villages in the district of Tikvesch were subjected to the depredations of the Turkish soldiers and Bashl-Basouks.

The villagers were beaten and tortured, the women violated and the houses plundered while the administrative authorities took no action. In the villayet of Monastir, artillery bombarded and rased the flourishing town of Smerdesch. 300 houses being left a heap of ruins. At the beginning of July 2 Greek bands, with the connivance of the authorities, plundered Bulgarian houses. In the villayet of Uskub the entire Bulgarian population has been systematically persecuted since last May. The director of the Normal School at Usl. b was imprisoned because his library contained the "revolutionary" works of "Othello" and "Les Miserables."

In Palanja, Kolischini, Koumanovo and Gostigar the prisons are filled with Bulgarian priests, schoolmasters and merchants. During June the soldiera and Bashl-Basouks terrorised the inhabitants of the Schilift district, torturing the people with red hot irons. Similar atrocities perpetrated in the vilayet of Adrianople are cited. Altogather the memorandum gives particulars of no less than 131 individual and general cases of excesses, and outrages committed by the Turkish authorities.

N EW YORK. Aug. 16.—Associate—
Sustice David J. Brewer of the
Supreme Court of the United
States has contributed to Leslie's
Weekly an article on the crime of lynching, in the course of which he
says:

"What can be done to stay this epidemic of lynching? One thing is the establishment of a great confidence in the summary and certain punishment of the criminal. Men are afraid of the law's delays and the uncertainty of its results. Not that they doubt the integrity of the judges, but they know that the law abounds with technical rules, and that appellate courts will often reverse a judgment or conviction for a disregard of such rules, notwithstanding a full belief in the guilt of the accused. If all were certain that the guilty ones would be premptly tried and punished, the inducement to lynch would be largety taken away. In an address which I delivered before the American Bar Association at Detroit the American Bar Association at De-troit some years since, I advocated do-ing away with appeals in criminal cases. It did not meet the favor of the association, but I still believe in its wisdom. "For nearly a hundred years the

"For nearly a hundred years there was no appeal from the judgment of conviction of criminal cases in our Federal courts, and no review except in a few cases in which two judges sitting, a difference of opinion on a question of law was certified to the Supreme Court. In England the rule has been that there will be no appeal in criminal cases, although a question of doubt might be reserved by the presiding judge for the consideration of his brethren. Hon. E. J. Phelps, who was Minister to England during Mr. Cleveland's first administration, once told me that while he was there, only two cases were so reversed. Does any one doubt that justice was fully administerd by the English courts?

It has not been proved, nor does it seem at all likely, that courts of compulsory arbitration will be able to enforce their awards without regard to fucutations of the market. The admission of the workingman to any sort of partnership with capital, involving the control of trade and inspection of books, seems out of the question; capital, which runs a risk and which alone is qualified to guide an enterprise, must retain control.

"Something might be done in the way of bringing home to the mind of the wiser members of the unions the broad truths of economy, such as that wages must ultimately be fixed, not by the master, but by the consumer, who is the real employer.

Sanjak of Kirkkiissé.

It is difficult, says the memorandum, to obtain the exact number of Eulgarians who were imprisoned, mostly on the filmsiest pretext, as when they were released, others were immediately arrested. The estimates obtainable give for the vilayet of Salonica, 300 prisoners; for Uskub, 500; for Monastir \$50, and for Adrianople 550, a grand total of 2800. As information is lacking from many districts in these is lacking from many districts in these vilayets, it is thought that without ex-aggeration the number of prisoners may be placed at even three times

Dealing with other acts of oppression, the memorandum states that the Bulgarian merchants living in Constantinople and Salonica were ordered to return to their native villages and were not allowed any time or opportunity to dispose of their business and property. Some of these Bulgarians, who with their families, had been established for twenty years or more. who with their families, had been established for twenty years or more, were utterly ruined. As the order applied equally to professors and school-masters, the Bulgarian schools were closed before the end of the school year. The althorities rigorously enforced the same order against the Bulgarian priests, making every effort to paralyze the development of religious and educational work and depriving the Bulgarian patriarch of all his privileges, and forced the people to come under the authority of the Greek patriarch. Encouraged by the Dittoman authorities, the Greek bishop and Archimandrites forced their way into the Bulgarian church, burned the

prayer books and employed menaces to compel the people to acknowledge the patriarch. The Archimandrite of Salonica declared in a recent sermon that the Sultan did not want Bulgarian exarches in his empire, and if they remained, they would be exterminated. In addition to the decree banishing the Bulgarian tradesmen from Constantinople and Salonica, the Porte adopted measures to ruin the traders adopted measures to ruin the traders. stantinople and Salonica, the Porte adopted measures to ruin the traders elsewhere. The Governor of Monastir issued an order, April 23, forbidding Bulgarians to go abroad, or even to Constantinople. This order was interpreted to prevent Bulgarians going to any large city and forcing them to deal only with the Turkish merchants. The provincial administration employed every possible means to install Mussulmans in the Bulgarian villages. On the slightest pretext, the Bulgarians were forced to sell their lands to the Turks at any price the latter chose to pay.

ians were forced to sell their lands to the Turks at any price the latter chose to pay.

Burdened with taxes, liable to perform statute labor for the Turkish landowners, the population is reduced to a state of serfdom. This is one of the principal causes of discontent, and when is added the exactions of the tax-gatherers, it is not difficult to understand why the wretched people should revolt from such a despotic government and servitude.

In conclusion, the memorandum asserts that the foregoing exposure once more condemns Ottoman administrative government in Europe. It says:

"Not long ago the Porte denounced these revolutionary movements as being fomented by Bulgaris, and tried to put the responsibility on this principality. Today it must be acknowledged that it is its bad administration which is the only cause for the trouble. From sad experiences the Porte must learn that cruel injustice and bloody repression do not restore order and peace in a country. Lastly, the Porte formally promised the Bulgarian government to cease the arrests of Bulgarian priests and schools, release the prisoners and punish the officials guilty of exactions; in short, to adopt a policy of justice and amelioration.

it has enacted sterner measures of re-pression. To give only one example: It is a prescribed condition of release that a Bulgarian prisoner must furnish financial or personal security, but in the latter case the surety must be by a Turkish subject of non-Bulgarian origin. It is easy to comprehend that the imprisoned Bulgarians find it im-possible to obtain release under such of Economy Should Prevail.

The memorandum has made a strong impression in diplomatic circles. Official reports assert that the insurgents, when they occupied the town of Krushevo, massacred all the Turks. The recapture of the town was effected by three Turkish columns operating from different points. The bombardment by the Turkish artillery exploded a number of dynamite mines beyond the rebel entrenchments, causing considerable damage. The insurgents then retired to the mountains, where the fighting continued. A large number of insurgents took refuge in in the church in the town, and the Turkish military commandant asked Constantinople for permission to bombard the church in reply, he was instructed not to bombard it, but to accept the surrender of the insurgents. Negotiations to this end are now proceeding.

GOV. DURBIN'S ACTIVITY.

SHAKES UP THE POLICE.

[BY DIRECT WIRE TO THE TIMES.]
INDIANAPOLIS, Aug. 16.—[Exclusive Dispatch.] D. C. Reardon, a Police Commissioner for the city of Marion, has been removed by Gov. Durbin and Marx Swaysey has been appointed in his place. The police superintendent has also been forced to resign, and will be replaced by a man acceptable to the Employers' Council. The significance of the changes is seen in the fact that Reardon is a member of the Glass Bottle Blowers' Union, while Swaysey is a prominent business man, and a member of the Employers' Council.

Some two weeks ago, the Governor called the Marion Police Commissioners here and indicated to them that he was not at all astisfied with the council and the property of the metals of the insurgents were killed, and are now proceeding.

(BY THE ASSOCIATED PRESS-P.M.)

WASHINGTON, Aug. 16.—A new set of Chinese regulations prepared by Commissioner-General of Immigration Sargent and approved by Secretary Cortelyou of the Department of Commerce and Labor, the juriadiction of the matter of the exclusion of Chinese having been transferred from the Treasury to the latter department, were made public today and are now ready for distribution. These rules designate what Chinese persons are permitted to land at ports of the United States under the provisions of the laws and treaties, together with the ports at which Chinese, other than Chinese diplomatic and consular officers, may land, and name the officers who have been vested with the power and authority heretofore conferred on collectors of customs, giving their stations and jurisdiction. Conditions are named to which every Chinese persons seeking admission into the United States under the provisions of the Act of 1392 for the provisions of the Act of

are sixty-one rules embraced in the new regulations. Accompanying the regulations are the laws and treaties relating to the exclusion of Chinese. Provision is made for a Bertillon record of all Chinese laborers arriving and departing at ports of entry, copies of such registry to be transmitted to the Commissioner-General of Immigration. Conditions are prescribed to which all Chinese persons claiming the right to transit through the United States to foreign territory must conform, as a condition preceding such privilege. Numerous changes have been necessary in the revision of these rules to make them conform to the transfer of jurisdiction over the subject from the Treasury Department to the Department of Commerce and Labor. Forms of blanks are prescribed and rules made for governing the officers charged with the enforcement of the Exclusion Act.

Owens Lake, and his bride is a popustreet, adjoining the park, for F. N. Smith.

L. D. Ledderman and family are now domiciled in their handsome new cottage at the northwest corner of Chicago and Third streets.

The miembers of Los Angeles Hive, No. 1, Ladies of the Maccabees, and their husbands, were entertained Saturday afternoon and evening by Mr. and Mrs. C. Gifford, No. 1433 Pennsylvania avenue. The rooms were handsomely decorated in the Maccabee colors, red, white and black, and this scheme was carried out in the place cards and table decorations. Those who assisted the hostess in receiving were Mmes. M. Merry, H. Walker, S. Keyms, J. Dutzler and E. Neel. Sessler's orchestra and the ladies present rendered a fine musical programme.

the presence of a company of infilmate friends. Mr. Minkler is a resident of Owens Lake, and his bride is a popular lady, who has made her home in this section of the city for several years. They have gone to their home at Owens Lake.

A jolly crowd of members from Mt. Pleasant Council, No. 147, and Los Angeles Council, No. 147, and Los Angeles Council, No. 171, Fraternal Aid Association, was entertained by the Rainier Council No. 584, at their lodge rooms in Florence. A committee from the Rainier Council met the visitors at the end of the Central-avenue car line, and gave them a hay ride to the hall. Charles F. Young of Mt. Pleasant Council, and G. F. Cromer of the Los Angeles Council, each gave interesting addresses on the sick benefit department, which is embracing all the councils of California. Dancing, refreshments and a social followed the session. Mr. and Mrs. B. H. F. Variel and daughter, Miss Lora, of No. 2237 Mich-igan avenue, have gone to McKensie Bridge, Or., for a months' outing. Miss Ethelwynn Cromwell of No.

Miss Cora Hathaway of No. 221 East Twenty-fifth street left yesterday for San Francisco, where she will visit relatives and friends for ten days. George Wride has purchased of Mrs. L. D. Newman a lot on the north side of East Twenty-eighth street for \$950. This property will be improved.

Oscar C. Carter of Indianapolis, Ind., has purchased of Mrs. M. E. Johnson her residence property on East Twenty-second street, between Griffith avenue and Stanford avenue.

L. Domeny is remodeling his two-story residence at No. 1271 East Adams street.

One of the most notable improvements which the heights have secured for many months is that now in progress in South Breed street. This street is in the hands of the grading contractors and is nearing completion. It is, in situation, one of the most prominent streets on the heights, and the unsightly ravine which ran across it, just to the south of First street, has long been an eyesore to progressive people here. This has now been graded up, and when the work of curbing and sidewalking is completed South Breed street will take rank with the best sections of the highlands.

It is reported that the Los Angeles story residence at No. 1271 East Adams

reason marked the long-suffering brute for its own and by obscuring his many virtues and playing upon his few defects and idiosyncrasies has compelled him since the day he was discovered by Anah in the wilderness to live under the torture of a faise and slanderous report. At last, however, he is being restored to his premer position in the social and econproper position in the social and econ-omic world.

In truth the mule, if he happens to

be a Missouri product, is a valuable, beautiful and lovely beast. For gen-eral all 'round purposes, in compari-son with the horse, mules are super-ior. They are easy and cheap to raise, easy to sell and hard to blemish. They go to the market early and bring bigger profits for the time, work and money expended in growing than any other stock. Time and hard work Protecting The Family

hard knocks make them stronger and tougher.

A mule does not wither or weaken with age. The process of years simply turns his coltish friskiness to contemplative sedateness, his aflvery voice to a rancous roar and his obstreperous heels to the paths of peace. His nabits, as they are better understood, are less feared and more appreciated. He is tractable, gentle, sympathetic and very intelligent. When well treated he loves his master, as Sancho, the companion of Don Quixote, and many old negroes in the South have proven.

He eats little and requires no shel-ter and toils to the bitter end without complaint or fatigue. He quickly un-derstands the whims of his driver and will go and can be guided without whip or rein. He is a dynamo in hide, an engine on hoof—a perfect machine in fiesh and blood which rarely gets out of order or temper.—[Kansa City Journal.

Judge Grosscup's prominence as a jurist entitles his views to respectsomewhat in advance-adds to, rather than detracts from their interest. posits. The number of depositors has vastly increased in recent years. These thousands of small depositors from the ranks of the thrifty, each depositing trifling sums, make up an immense agbers of cases—perhaps in a great ma-jority—merely temporary, the depositors not desiring to make permanent in-vestments, but content to get their vestments, but content to get their bank interest. JAPANESE IMMIGRATION

And now it is the Japanese who is the intimation that comes in a special dispatch from Washington, published in The Times of Thursday. Mr. Sargent, the Commissioner-General of Immigration, thinks that Congress will be called upon to discuss this question at an early day. He has just re-turned from a visit to the Pacific Coast and Hawaii, and reports a widespread sentiment on this Coast, which he says is growing stronger all the time, in favor of Japanese exclusion, or at least in regard to some form of regu-least in regard to some form of regu-lation. He says the Japanese are com-ing to the United States in large and constantly-increasing numbers, and that there are at present no less reliable and quarrelsome.

nese, but as a rule are not so 2as his bond, which cannot always be truthfully said of the Japanese. On the other hand, as Mr. Sargent says, the Japanese differ from the Chinese in readily adopting American manners and customs, while a Chinaman stays a Chinaman, even though he has lived half a century in this country. There are a few exceptions to this, but they only go to prove the rule.

It looks rather unreasonable to talk al banks are supervised by the of excluding the Japanese from this rernment. The suggestion is someat novel. It is evidently not with a crying demand for labor in our fields and orchards, so that thousands of tons of fruit have been allowed to go to waste during the past couple of years. Then, again, the Japanese are in great demand as domestic servants helping in a measure to solve for the Pacific Coast housewife the exceedingly diffi-cult problem of domestic help. Nor can they be charged with working at too cheap a rate, for a Japanese household servant who understands his busi-ness and is able to do plain cooking can readily command as much as \$10 a week, with board, or more than the

average white girl receives.

If a low and undesirable class of Japanese have been coming over to this country of late, then the sensible plan would be to devise some method of excluding that kind of immigrants, just as we aim to exclude undesirable immigrants of other nationalities. There would be no more sense in proscribing the Japanese, as a nation, than there would be in forbidding the entry into the United States of Hungarians, or Poles, or Italians, from all of which countries come a large referred to. Japan is not like China, a country that could send us more male immigrants who are no more desirable than the Japanese haborers referred to. Japan is not like China, a country that could send us more male immigrants than there are men, women and children in the United States, without seriously depleting its population. The United States mights probably absorb the entire population of Japan without much difficulty, if they should settle on the land. However, the control of the land of the land of the land of the clipy council is that the in other cities, Washington, D. C., for instance, as one writer of a late the The Times points out, the municipality takes charge of trees along the streets after they are planted, and even does the planting. Los Angeles is probably too busy, and spending too much money just now for other things, to enter upon a campaign of tree-planting, as a municipality, in parallel other things, to enter upon a campaign of tree-planting, as a municipality, in parallel other things, to enter upon a campaign of tree-planting. nacy and venality by supporting the aspirations of Panama, a province of olombia, for independence, recognizng a separate government for that struction of the canal.

To the average person it will appear that this is rather a clumsy way of "whipping the devil around the stump," and one, moreover, that is fraught with the possibilities of grave complications and dangers. Have we not already responsibilities enough on our hands, in That the public in general has profited the shape of Spanish-American peoples In some degree by the changed conditions is indicated by the vast increase to speak of Cuba, to which country in savings deposits, which Judge Gross-cup regards rather as a sinister indication of the philippines, not to speak of Cuba, to which country in savings deposits, which Judge Gross-cup regards rather as a sinister indication of the property In savings deposits, which Judge Grosscup regards rather as a sinister indication than a favorable one. This much,
at least, is to be said regarding the
savings deposits: They represent earnings in excess of the cost of living,

old regime, when the prices of commooutpreaks of nature and for man? Such old regime, when the prices of commo-outbreaks of nature and of man? Such dities were higher and the average a step would certainly lend some force wage much lower.

Another fact should be taken into account when discussing this matter of the large increase in savings-bank deposits. The number of depositors has wastly increased in recent years. These thousands of small depositors from thousands of small depositors from thousands of small depositors from the subject of the yeopie of the New World is dictated by interested motives, and that we ultimous and the average to the assertions of the people of the New World is dictated by interested motives, and that we ultimately alm to gobble the whole hemi-

Some days ago The Times had the joy of reprinting from a Blebee, Ariz., newspaper an excerpt in which the laudationist of bourbon, one Mark Smith, Congressman from the head waters of the Hassayampa, was compared with the Star of the Morning and as the subject of a chemical analysis, or some such thing. Manufacturers Sending Commercial Museum to Russia.

Prospect That United States May Monopolize Cotton Manufactures of the World.

WASHINGTON (D.C.) Aug. 10.— From American consular officers in all parts of the world come interesting re-

Some of the leading American manufacturers have combined and are sending a perambulating sample expedition, organized upon an extensive scale, to travel through all parts of Russia. The men in charge, of this traveling commercial museum are experts in trade and manufactures and are familiar with the Russian language and business methods. A similar move is contemplated by the Japanese exporting merchants. They are preparing to send a sample exhibit to the principal trade centers of Siberia. The Italian manufacturers have established a sample warehouse in Smyra, Asia Minor. Throughout the world the signs of the times point to a fierce struggle for ascendency in export trade, and it is evident that the American manufacturers will not be able in the future to rely entirely ugon having something which no one else can furnish.

The State department is informed that, notwithstanding the sharp competition from American bidders, a German factory in Berlin has secured the contract to fit up the waiting rooms of the 324 stations on the Siberian railroad. The contract calls exclusively for wooden furniture, among other ftems being sixteen thousand chairs of the same pattern, and tables, divans, sideboards, washstands, etc. Information has also been received to the effect that at least 150 millon dollars of German capital is now invested in the German capital is now invested in the Transvaal. It is represented by com-mercial houses, real estate loans, mines and industrial undertakings.

and industrial undertakings.

Consul Haynes writes from Rouen, France, that the French people are concerned with a serious crisis in the matter of a supply of raw cotton, which is seiling at the highest price obtained since 1895. It was thought, last year, that there was a big crop ahead, and the manufacturers did not buy. This position was taken by the mill men throughout Europe. The situation has thoroughly aroused the French manufacturers to their dependence upon the United States.

M. Pierre Baudin, ex-Minister of Public Works, in commenting upon the situation says: "The market is dominated by one fact which directly menaces the consumers and manufacturers

as much as we needed it, but now American spindles are using what we need. If, after some years, looms are multiplied sufficiently there to absorb all the twelve or afteen million bales harvested in the United States, Europe would for the most part be compelled to close her milis."

As a possible remedy for this dependence upon the United States cotton crop, the Minister suggests that, the colonial cotton area be enlarged as much as possible. Investigations have been made in South Africa, and trais are in progress in the Soudan and in the valley of the Niger. One of the leading economical journals of Paris, in commenting upon these facts, says: "We are dependent upon America for our cotton. We are dependent upon America for our woolen industry. We are dependent upon Russia for our linen industry, The list could be added to, but is it not sufficient to convince us that it is full time to take care of our economic independence?"

dependence?"

Consul-General Hughes, writing from Coburg, sends an extract from a South African export journal, in which it is predicted that the dependence of the British cotton mills upon the Unite! Stages will soon be greatly modified. This article says in part: "Samples of Rhodesian cotton have been dealt with by a Liverpool cotton broker, and it has been found that they will be able to command the highest prices on the Liverpool market for white cetter. has been found that they will be able to command the highest prices on the Liverpool market for white ootton. A syndicate has been formed to embark in cotton growing in Rhodesia for the British market. It is to engage in the enterprise under special advantages. The cropping of some of the varieties is continuous, and during the harvesting period of the crop there is an ample, even overwhelming, supply of native labor available on the spot. There appears no difficulty in the way of securing a permanent African cotton supply. Of the economic value of such a market to the country we need say nothing. It is obvious."

The Bureau of Statistics, in view of the intense interest now taken in Europe, in the American cotton crop, has compiled some figures showing the increasing proportion of the crop which is now used by American mills. These figures show that, of the world's cotton crop for the six years ending June 30, 1992, the United States produced 74.5 per cent, and that for the entire six years, the total production was only 192,566 bales more than the consumption. From 1898 to the present day the prices of the raw product have risen steadily. The press throughout Europe is earnestly insisting upon a new supply of raw cotton to be secured by developing virgin areas on the African continent, and it is claimed that every encouragement has resulted from careful and business-like experiments which have been made in that direction.

France, writes very positively concerning the requirements of the French import trade. He says: "American exporters very often judge the value of their goods and the needs of foreign purchasers by their own standard. This standard may be true, as far as the conditions of the United States are concerned, and partly or entirely faise.

standard may be true, as far as the conditions of the United States are concerned, and partly or entirely false when applied to other countries. The American manufacturer should know the requirements of the people whose trade he seeks, and should try to satisfy them.

The French have fixed habits, from which they do not easily change, nor wish to change. Once satisfied with a certain manufactured product and theroughly accustomed to it, they will not change except from inability to obtain it or for marked improvement in some new article, which must be clearly demonstrated. Everybody wants the best, but the improved article or new product must be brought to the attention of the prospective purchaser in a very definite fashion.

"American exporters desirous of doing business in France must adapt themselves to the needs of the country. Their circulars should be printed, and their correspondence carried on in French. Their commercial travelers should speak that language. The fact that neither buyer nor seller understands the other well causes at least hesitation and detail in reaching business. The French think, and perhaps with more or less reason, that we are not always careful in our business methods, and although sincere in recommending our goods, are very often not sufficiently acquainted with the qualities they possess. We send our wares to France. declaring that there are none better. This may be perfectly true from our point of view, but the natural richness of our country has rendered us more or less prodigal, and we have not made the careful study of the economic values of certain products that have been made in France. Let us take two commodities, coal and the economic values of certain products that have been made in France. Let us take two commodities, coal and lubricating oils, for instance. Several million tons of coal are imported annually, while the entire quantity of petroleum used is important. The necessity of buying from another country, of paying transport and high duty, has forced a careful study in economical values, by means of theoretic computation, most delicate laboratory tests and practical experiments. Most of the French railway companies have a laboratory apparatus for tests, not used at all by us, and perhaps in some instances not known to the shippers of the commodities.

"Off exporters, in order to further their own interests, should also, as far as their relations with France are concerned, adapt their business to the metric system of weights and measures. There is nothing more annoying to a French purchaser than to be forced to make a reduction of our weights to the very reasonable and logical metric system.

"I ballers that our commercial relations."

very reasonable and logical metric system.

"I believe that our commercial relations in France can be greatly augmented by a better mutual understanding of business habits and the requirements of the market. The friendliness of these relations would be still further enhanced by the total disappearance of that suspicion which owes its existence to lack of acquaintance.

"No man has a keener sense of business honor than a Frenchman. Cultivation of his acquaintance by actual contact in business will dispel on both sides any doubts of the genuineness of American or French sincerity."

The Cripples should be easy this week on the Looloos' own grounds, and if they are Los Angeles can't loose the pennant, for San Francisco has a hard week at home with the tough Portland team.

Reilily's Nationals will show many faces new to the local fans, and the Hildebrand battery is believed to be the best on the Coast, from all reports. Of the five or six new men, all are good ones, and one of the new ones is the old favorite, Eddie Householder. Reilily has done remarkably well with his team since it left here and he promises even better baseball on this home series. CHICAGO, Aug. 16.—Chicago won two exciting games from Washington today. WINTER LEAGUE.

GRIEFERS MAY JOIN IT. The proposition of a winter baseball league is being agitated, and J. M. Dodge and A. R. Russell of San Diego are now in Los Angeles to discuss the matter with Los Angeles parties. It is understood that Los Angeles has been doing some talking in regard to winter baseball, but no decision has been reached. Santa Barbara, San Bernardino and San Diego are counted on to come in, but what other places will join, is not yet settled. There will be no lack of material for the make-up of the number of teams, as there will be many members of the league now playing, who will gladly remain in California for the winter, on a small salary, to enjoy the climate and keep themselves in good shape for next season. matter with Los Angeles parties. at bat four times and made two double baggers, one run and eleven outs, without an error.

A story from the East is that Phyle really had to be dropped from the Milwaukee team because he tried to kill too much whisky.

The Western League is about near the end of its rope, for the American Association seems to be beating it to death. The Western may not be in existence next year, but if it is, it will probably be a six-club league, minus Milwaukee and Kansas City.

From the way Portland walloped Sacramento and the manner in which Mike's men have treated the Looloos, the Portlands must be about in a strong as any team in the Coast League.

Charley has apparently managed the Los Angeles Nationals in a very successful manner. For days at a stretch he was forced to fill up his ranks with amateur bush leaguers, and yet won more than half the games. This is stepping some.

Umpire Colgan states that young Hildebrand of Rellly's Nationals is one of the best pitchers in the business. It is said that he is only in the game now for love of it and will not pitch in any of the big Eastern clubs, because he gets a big salary from Princeton University for coaching the athletic team there.

Hollingsworth and Huriburt are not playing with Portland at present, on account of the injunctions that are in force against them.

When the Looloos return tomorrow, they may bring Third Baseman Andrews with them. He formerly played with the Portland Coasters.

Howling has about held its own this past week among other sports, notwithstanding the hot weather and the overpowering influence of the big prize fights in San Francisco. Bowling is something that flourishes best if cold weather and no real enthusiasm can be expected until November.

However, the boys intend to whoop things this week, and particularly those who make the Monarch alleys their headquarters, by having another duckpln bournament. It will consist of twenty games, to be bowled in blocks of five, total pins to count. The first five games will be bowled tomorrow night and the remaining games, on Thursday, August 25, The following players have already entered: F. W. Samuelson, W. Phillips, Dr. W. K. Holladay, A. NINEPIN TOURNEY.

Next week the tengin artists will take off one pin and make themselves believe they are ninepin cracks, for they intend to inaugurate a ninepin tournament. The entrance fee will be \$\frac{1}{2}\$ and there will be twenty games played on four different nights at different alleys. All of the alley owners have taken kindly to the scheme and as the players themselves proposed the tournament, it is bound to be a success. The alleys where the matches will be played, and the dates, are as follows: Belmont, August 24; Collseum, August 21; Oaks, August 31; Monarch, September 3.

INTERURBAN LEAGUE.

INTERURBAN LEAGUE. The Interurban Bowling League will meet at the Monarch alleys this evening to elect officers to attend to other league business. John H. Chick is spoken of as president for the league. Six teams are already entered in the coming league tournament and other entries are expected from Ocean Park, Santa Monica and Hollywood. The teams and players entered are as follows:

HIGH GAMES.

Last week Hungerford and Bowron bowled five games at the Monarch on Friday for a purse of \$20. Hungerford winning by a score of 1134 to 1005, as follows:

Hungerford ... 219 202 247 211 255-2264-5

Bowron 176 191 208 223 208-201 1-6

Ed Clark, more affectionately known as "Shuffle Board," made twelve straight strikes on the Collseum alleys in a match game last week. Had they been in one game, he would have won the \$100 prize for a perfect score. As it, was, he made 280, which is the best score bowled in this city for months. He started with a strike, and then made a spare, following this with ten strikes.

S. W. Pearce, an owner of alleys in Ban Francisco, visited in this city the past week and at the Monarch alleys averaged a fraction over 97 for five games of duck pins. He states that bowling is booming in San Francisco. COLISEUMS WON.

FISH OF LARGE SIZE AND APPEAR UNUSUALLY HUNGRY.

in the Shape of Bait-Some Splendid Catches Are Made-Fish in Unusual

The court of King Croaker celebrated in dassling style yesterday. In the Bay of San Pedro from Dead Man's Island to Harry Lynch's wharf there were boatloads of angiers scattered at intervals, and the prediction of good sport was thoroughly verified on the afternoon ebb. Several times before during the present month there have been flurries of excitement in the channel, but up to yesterday there has been no croaker run at all; only weak, half-hearted imitations.

For once the hungry horde of spotfins hoisted the black flag and declared death on everything edible in the shape of bait. They were present apparently in shoals and millions; the angiers could not cut clams fast enough for them, and the spotfins were so hungry and so omnipresent that they never gave the sharks, stingrays and other marine monstrosities a chance for their respective white alleys. Bait could no sooner hit the bottom than the croakers were at it.

One worthy nailed a brace before the boat anchor had caught, and landed croakers in the bay, all of the spotfin him, for their sides were as bright as gold, and the sea lice were still on them; misnomers these lice, for they never attach themselves to anything but perfectly-conditioned fish.

A big group gathered at the cannery but had indifferent sport, while dead across channel half a dozen boatloads of regulars and intermittents were actually kept busier than was comfortable. A few misguided ones tried the time-honored two-rod gag and had to rele-

The production of nitric acid by electro-chemical methods is a new process that promises extensive changes in our agriculture. The manufacture of nitric acid from the nitro-gen and oxygen of the air in sufficient quantities for commercial use has been the dream and hope of scientists for years. At Niagara experiments have been conducted successfully in producing commercial nitric acid by using a high-tension current in an air chamber, by which a yield of one pound of nitric acid is obtained for every seven horse-power hours.

The only question was how best to stop it.

The way of the day is carelessness on the part of the young men, all the "professors" concede. These youths simply do not think, and their arms and hands, once conventionally placed, slip around to easier and more natural postures. In consequence, all over the country, in every town from California to Maine, "nice" girls are being held in positions that would do discredit to the toughest dance. The dancing masters say that unless something is done quickly, dancing among good people will get a black eys. They have had to take the initiative for the reason that the young folks, men and girls alike, do not seem to realize this.

So out in Pittsburgh the dancing men established a new position for the two-step and the walts.

The official posture of a year ago was an excellent one, just so long as it was not abused. But abuse and exaggeration of it came quickly. The two guiding arms, that of the man and that of the girl, instead of remaining down, stretched out, fingers gradually drew up, crooked in a manner never intended by anyone, until at last they were bent double, up almost (sometimes quite) on a level with the faces, and crowded in between girl and man. In proper dancing fingers, gradually drew up, crooked in a manner never intended by anyone, until at last they were bent double, up almost (sometimes quite) on a level with the faces, and crowded in between girl and man. In proper dancing fingers should only lightly touch, With these new developments, however, the girl's hand became awkwardly and roughly gripped and twisted backward, so that it could

that the coming year is certain to see improvement. If improvement does not come and speedily it is altogether likely to be as the Dancing Masters' Association fears, that many mothers and fathers will set their faces plainly against their daughters and sons dancing at all. The new "position" is to be fought for definitely and thoroughly. It will be strange if the dancing teachers do not carry their point conclusively before many months have gone by.

England's Common School System.

England's common-school system is peculiar. It is a chaotic dual system. There are, first, the voluntary schools-church-controlled schools, founded and supported by voluntary effort, with the aid of the government. Then there are the board schools, organized within the last thirty years, maintained by the municipalities, with government aid. The board schools have been called "Godless schools" by the churchmen, because they are founded on this provision: "No religious catechism or religious formulary which is distinctive of any particular denomination shall be taught in the school." The 12,000 church schools, with 2500 other voluntary schools of Roman and non-conformist churches, instruct 3,200,000 children; the new board schools have 2,800,000 children enrolled. Under the cloak of nationalizing the school system, and bringing all the schools under popular control, the education bill charges the taxpayers with the support of the church schools. As a sop to the non-conformist the church-schools. England's Common School System.

The Times has just issued another edition of its special four-page Pree-Labor Number for circulation among "independent workers, captains of industry; and all employers and employees who prise their lawful rights." Its contents are mainly reproductions of editorial articles and facts and statistics which have appeared in this paper from time to time heretofore, and are now brought together in this form. The matter shows again, and even more clearly, what The Times stands for, vis.: Liberty regulated by law, and independent, untrammeled labor; also what it is unalterably opposed to, vis.: Strikes, boycotts, picketing, conspiracies and needless industrial disturbances, to the great detriment of the country.

This is not the only phase in which the present capp meeting differs from those generally seen. In close proximity to the pavilion, where the faithful are instructed in the mysticisms of the spiritualistic cult, there are the booths of palmists, card-readers, ir ince mediums, spirit-photographers, etc., all ready, for a consideration, oceant their mediumistic influences and start yoù on the broad highway to health, wealth and happiness.

"It is the cleanest camp ground every ener in the history of our meetings," said the president of the association to a Times reporter, yesterday. Sultan of Sulu a Sport.

Sultan of Sulu a Sport.

After three years of service as a surgeon in the United States army in the Philippines, Dr. E. R. Tenney of Kansas City, Kan., has returned to his home in this city.

The Sultan of Sulu, as described by Dr. Tenney, is hardly the sort of potentate pictured in comic opera. He is a Vec ordinary individual, who lives in a very ordinary way and does about as all the rest of the Sulus do.

"The Sultan of Sulu assumes control over all the Moros," Dr. Tenney said, "but in reality he has no control over any but those who choose to follow him. I met the Sultan on several occasions and was treated very cordially by him. He is not a man of great strength of character or intellgence, but possesses craft and cunning. The greatest man in the Sultan's domain is Haji Butu, the Prime Minister.

"I visit the Sultan in his home at Miabon, directly across the island of Sulu from the town of Jolo. It is a very ordinary house—nothing like a great palace—and only a little better than the average native home. He has four legal wives and a fine string of ponles.

"His chief sport is to bring down

four legal wives and a fine string of ponles.

"His chief sport is to bring down his ponies and race them against the army officers' ponies with such ride attractions as spear dances, accompanied by gongs, tomtoms and native drums. These are the musical instruments of the Sulus, for the Sulus armot a musical people like the Filipinos.

"The Sultan sometimes wears European clothes, and while he entertains his guests very nicely after his own

pean clothes, and while he entertuins his guests very nicely after his own fashion, he seldom gives a feast. The datos, or feudal lords, however, sometimes prepare feasts for their guests of sugars, fried banamas, rice cakes, heavy and fried in cocoanut oil, with native chocolate as a beverage. The Sulus are Mohammedans, and they have no intoxicating beverages. They chew the betel nut, which blackens the teeth and takes the place of to-bacco, and an important part of a Suluir outfit is a betel nut box, borne by a slave. The women are permitted to chew the betel nut after they are married, and they marry at from 14 to 18 years of age."—[Kansas City Stan.

Will go north to visit the homes at Yountville. Roseburgh, Or.; and at Orting. Wash.. proceeding thence via the Northern Pacific to complete the tour with several Eastern visitations. The official inspection is a yearly oc-currence.

An Automatic Doctor.

"We're never able to meet the demand for slot-machine novelites," said the man in the business. "We're all looking around now for something new for the St. Louis World's Fair.

"Personally I don't care so much about fairs. The machines get a good play there, but there are so many counter attractions and you have to give up such a percentage to get on the grounds that in the end you're not much ahead.

"I'd rather have all the New York hotels for mine than all the fairs that ever happened. The people who pass in and out through New York hotels and their barrooms have money, and spend nickels without thinking twice.

"Take the case of the fellow who got the talking scale which made such a hit along Broadway. The Sun printed a piece telling how you got on it, and the scale hollered out your weight. That was reprinted all over the country, and orders piled in on the makers so they could have shipped out 2500 a week if they had them.

"But their plant was a small one, and they could produce only about fifteen machines a week, and they had to buy the scale bases from another small manufacturer. So the free advertising they got has only driven them frantic.

"They can sit down and figure how."

be seen in favorable weather for more than forty miles has just been installed by the German government upon the Island Heligoland, in the German Ocean, It is the most wonderful in the world. The light used equals 20,000,000 candle-power. The light lasts one-fifth of a second and repeats itself in five seconds. It illumines the entire horizon in that period. At forty miles' distance the pencil of light flashes over the sea at the rate of 180,000 miles an hour.

The German parabolic mirror reflector is used.

About the middle of the nineties, says Ueber Land und Meer, German experts were sent to France by the German imperial government to study flashlights. They were convinced that by means of two or more reflectors, erected upon a reflector with Schukert's glass parabolic mirror, results equal to those of France could be produced.

Experiments were made in Nuremberg. The revolving reflector of the German apparatus was found equal to the Frenchman's revolving light, As soon as the experts had demonstrated their point work was begun on a light reflector equal to the largest ever used. When the weather is favorable the beams go far beyond the central fires or light rays. On the first night that the new light, was used list peculiar flashing beams were seen by people standing on the mole at Busum, a distance of sixty-five kilometers, or a trifle over forty miles.

The watchers in 112 lighthouse at Amerum, about the same distance, were able to see the same beams as they

Fortunately, ft is the fashion just now for rich mothers to train their daughters to do this. Many a man in these days, however, marries a girl who cannot cook a chop, and will not wash a dish, nor do a blessed thing in household work except make 'angel-food cake that is just too lovely for anything.' But the sad fact is, the man she has married is not an angel by a long measure, and refuses to be comforted with anything leas mundane than a first-class bit of broiled steak. Half a dozen good steaks to one angel-food cake is about the proper propertion. "Cultivate the heart and the actional."

tainly those are not that take their rise in doubt and unbellef. By faith alone do we rise into the life of God and have fellowship with the Father and with His Son Jesus Christ, yet the doubter is the common, and the believer the exceptional being in this world. Faith is objected to as mystical, and as making religion hard and almost impracticable of realization. How many sigh before the demands of faith and say, if only we could see the physical Christian life be. But our context is a rebuke to all such thoughts, and so is all Christian history. For instance what little Christian life there is to remark in the disciples of Christ while He was physically with them. Elementary spiritual truths for the most part were not understood by them, and the realm of sense dominated their conceptions and conduct so that they were almost strangers to the real things and ways of God. But how changed these very same people from the beginning of the spiritual dispensation. They were transformed, walking the earth and doing their work as new creatures, and Christ, who in the days of His flesh, was such a mysterious person, was perceived in clearest outline, a Being of whom they could speak, in the fervent language of certitude, and the Bible became to them a book of life, pulsating with present-day messages. You may then underscore this in your

The former Judge H. C. Henderson was a member of the Iowa State Senate that ratified the adoption of the constitutional amendment abolishing slavery. He was born in Brownsville, Tenn., in 1877, later moving to Illinois his a boy, snd, thence to Iowa in 1848. In 1849 he was appointed a clerk in the Treasury Department at Washington, which position he held-until 1852, when he removed to Rock Island, Ill., and began the practice of law. In 1856 he moved to Marshalltown, Iowa, and from there to Colorado, for the benefit of his wife's helpith, in 1891. Mrs. Henderson died in 1895, and in April, 1900. Judge Henderson moved to Los Angeles, where he practiced law for two years, retiring from active life on account of ill health.

While residing in Iowa he was considered one of the ablest lawyers of the State, and was judge of the District Court of the Eleventh District for a number of years. He figured several times as a candidate for the nomination of Justice of the Supreme Court and for Congress.

SAN BERNARDINO.

MEXICAN'S TOUGH HEAD.

SAN BERNARDINO, Aug. 16.—Untrown assailants attacked José Quarto yesterday with an ax, laying open his soaip in several places and pounding him into a state of insensibility, and wit today he is able to be around. Yesterday afternoon the police were notified that a corpse was lying on the street east of town, and hurrying to the place with an ambulance they found Quarto covered with blood, and apparently lifeless. He was removed to the hospital, where the wounds in the hospital, where the wounds in his head were bound up, and there he are, seemingly hovering between life and death, for several hours. Just when the attendants supposed the man ready to die, he suddenly sat bolt upright, rubbed his eyes, and then clambered to his feet. He could recall nothing about the assault. It is evident that he was struck from behind and hour after his return to his senses he was able to waik from the hospital, and now is apparently well able to look after himself.

STILL THRASHING GRAIN.

Grain thrashing in this valley still continues, with an average output. of nearly ten thousand stacks per day, and judging from the amount of untrashed grain yet on hand, it will be at least thirty days before the grain harvest will be completed. The yield is excellent and in many cases far ahead of former years. Notwithstanding that the acreage sown to grain this year is considerably less than in former years, the total output exceeds former years very materially. The largest shipment of the season was made this week, when fifty thousand sucks were shipped in one lot to Port Harford and from there transported by a specially chartered steamer direct to Port Costa for export. The bean crop is fine and with the prevailing foggy weather the bean growers are assured an unusually good season. STILL THRASHING GRAIN.

There have also been added to the list of prizes two scholerships of the Home Study Department of the Long Beach Business College and Correspondence Institute. One of these is in the shorthand and the other for the bookkeeping course. The value of correspondence schools has come to be well known, and there now are thousands of people, young and old, all over the country, educating themselves in the useful branches of learning by studying at home, without any instruction except that given by mail from

Now, then, a long pull, a strong pull and a pull altogether. But two full weeks more of the scholarship contest remain, and it will behoove all those who expect to be at or near the top at the finish and get the pick of the scholarships and cash prizes, to make every day count from now on. All the votes should be in by the first day of September, but a few days of grace will be given if the occasion seems to require it, to make the final clean-up. The exact day and hour when the contest will be officially declared closed will be announced in pienty of time to give all concerned due notice.

Those who have not yet notified the scholarships, will please do so at once, as the time is approaching when the list of prizes must be completed. There are still a few more scholarships to be procured and before they are arranged for. The Times wants to know what additional ones it is best to get.

ships, and possibly a few more business college or correspondence school scholarships, as the needs of the contest may develop.

The number of scholarships to be awarded will certainly not be less than thirty, and if those below thirtieth place in the score work good and hard until the end there may be scholarships enough to supply half a dozen more. To make sure of winning, though, the minimum score at the wind-up should not be less than 20,000. Twenty-five have already passed that number. Surely ten more ought to be able to attain it in the closing days of the contest.

Anybody can assist a candidate for a scholarship by cutting out the daily coupon printed in The Times and writing the name of the candidate upon it and sending it to the Scholarship Manager. Greater assistance can be given

Electric Railway from Lamanda to Monrovia, through the Villa and Sierra Madre, looks good to the people of this place, and when this connection is made it will put the town in touch with considerable more territory. The Pacific Electric engineers have been busy in our streets during the past two weeks, and they have more improvements mapped out for this place than any other town in Southern California, outside of Los Angeles and Pasadena.

Cars will be run through Monrovia both ways to Los Angeles.

NEWS AND BUSINESS.

The sale of seats for Egra Kendall in "The Vinegar Maker" will open at the Mason Operahouse this morning at 8 o'clock.

Girl Bit Her Tongue. Marie Baumister, a six-year-old girl, living at Hollywood, met the ancient misfortune of childhood in a more serious form thin usual yesterday, by biting the end of her tongue nearly off. She was playing in one of Hollywood's streets just torn up for grading, and stumbled over a rock.

Tut's Bad Judgment. Tut Espey, a negro of bad reputation, who thinks he is a scrapper, but always picks a better man than himself to fight with, was laid low yesterday evening on San Pedro street by a brick in the hands of Jack Woods, the colored "pug." Tut was treated at the Receiving Hospital for a scalp that resembled a plowed field.

Beer Seller Bagged.

J. Sarrazin, bartender for Charles Faure, proprietor of the saloon at No. 243 Aliso street, was arrested yesterday morning by Patrolment Parker and Wood for violating the liquor license ordinance. The officers, who were in citizens' clothes, found the barroom well filled with patrons, and Sarrazin doing a rushing business. He was released at the Police Station on depositing \$100.

Linemen Go Back. Word was received here yesterday by the telephone management that the striking linemen at San José would go back to work this morning. They have received no support from other unions, though it had been promised &em, and are tired of the fight. As for Los Angeles, the telephone companies have all the men they can use and there is no "going back" to be done.

Assaulted and Robbed.

The funeral services over the late Charles Forrester, who died Saturday morning, as mentioned in Sunday's Times, will be held this afternoon at 3:30 o'clock at the family residence, No. 346 South Figueroa street, Besides three children, deceased leaves a widow, Mrs. Minerva D. Forrester, Mr. Porrester was enthusiastic in his efforts to advance the interests of Southern California and it is said that many persons came here to remain by reason of his work and interest.

Soul-winning Army.

Soul-winning Army. Soul-winning Army.

Large gatherings and fervent spiritual success formed the distinguishing feature of the sessions held at the Salvation Army tent at Seventh street and Grand avenue yesterday. Maj. and Mrs. Connett were assisted by a staff of efficient workers, the music was appropriate and much interest was taken by the auditors. Evening services at 7:30 o'clock will be continued throughout the week, special meetings being held Wednesday and Thursday under the leadership of Adjt. and Mrs. Wolfe and Adjt. and Mrs. Fagg. One of the army bands will be prepent.

Toughs Assaulted Motorman.

A. J. Daggett and Gustave Buelow, two toughs who "took in" the B'nai B'rith picnic at the Central-avenue Gardens yesterday, were arrested last night for assaulting Richard O'Nell, motorman of a Central-avenue car. These two hoodlums, with five or six others, quarreled with the conductor of the car over a matter of change at the Vernon-avenue terminus. Both were full of liquor, and either Daggett or Buelow struck O'Nell in the face with a beer glass. In the melée that followed, O'Nell received several blows in the face, The arrival of an officer caimed all parties and the aggressors were led to jail.

Fleet Burglar Caught.

Piect Burgiar Caught.

Pedro Santa Ana, a sneak thief, who makes a specialty of preying on fellow-Mexicans, was captured near the Plasa at 3:30 o'clock yesterday morning a few minutes after he had committed a burgiary. Santa Ana opened the door of Telesfora Mariscal's Boom in the Los Angeles lodging-house, at No. 418 North Main street, and stole a pair of shoes. The landlord and Mariscal heard the noise and gave the alarm. They, with Officers Arguello and Baker and a fifth person, chased Santa Ana four blocks and caught him, although the burgier had taken off his own shoes before his entry to the room, pregared both for silence and flight. He dropped Mariscal's shoes just before he was caught and they will be used for evidence.

CORONADO PRIEST DISMISSED.

SPECIAL CORRESPONDENCE OF THE TIMES 1

SAN DIEGO, Aug. 14.—Rev. Father
Donohue, secretary to Bishop Conaty,
officiated at the services of the Catholic Church in Coronado today. Father
Donohue was sent here to displace
Father McManis, who was sent here
from an eastern diocese several
months ago to take charge of the Coronado Church. The priest's friends insist that there is trouble with his mental faculties, which accounts for his
strange actions of late. On Friday
McManis that a letter to one of the
local papers arraigning E. S. Babcock,
president of the Coronado Beach Company, and manager of Hotel Del Coronado, for endangering human life by
laying a railroad track close by the
Catholic Church. He stated that he
was looking up the law and intimated
that he was to proceed against Babcock in the courts.

SAN DIEGO BREVITIES. CORONADO PRIEST DISMISSED.

SAN DIEGO BREVITIES. Caspar Schaunts, a teamster living at No. 904 Summit avenue, was assaulted by two convivial companions in the tenderioin yesterday morning at 3 o'clock and was robbed of \$1.05 and a cheap watch. Schaunts was invited to drink in some winery—he didn't know whose—by the men. Then they decoyed him outside and one knocked him down with a wine bottle, lacerating his right ear with the blow and cutting a gash over his right eye. Schaunts was treated at the Receiving Hospital.

Mrs. Perry Dased.

In a dased condition, caused by concussion of the brain, Mrs. Harriet Perry of No. 422 South Grand avenue, was taken to the Receiving Hospital Saturday and only recovered sufficiently to talk yesterday morning. She stepped from a Boyle Heights car at 16 o'clock Saturday night, seemingify with premeditation, while it was descending the west incline of the First-street bridge, and struck on the back of her head against the wooden flooring. Passengers who saw Mrs. Perry step off say that she did so deliberately. Mrs. Perry, who is a middle-aged woman, says that she gave the conductor a signal to stop, and in her haste to alight was heedless that the car was moving. The woman's husband is a wreck from drinking.
